

Introducing Intacct

Transforming Small Business Accounting and Financial Management

Intacct is the new on-demand accounting and financial management solution that will transform the way you work with your accounting firm and manage your financial data.

Now you can reduce costs, boost productivity, and increase profitability!

With today's turbulent economy, businesses of all sizes need smarter, more efficient ways to reduce costs and increase productivity. As your trusted business advisor and accounting professional, we recommend Intacct for all of your accounting and financial management needs. This state-of-the-art, web-based on-demand accounting and financial management solution will help you get more done in less time using fewer people and resources.

Why we recommend Intacct:

- Offers real-time collaboration with your CPA or accounting professional
- Enables your CPA to deliver better financial advice and make faster, smarter business decisions on your behalf
- You can pay bills, process invoices, approve employee expenses, generate financial reports and more. You and your CPA can do it all with Intacct.
- Access and manage your business and financial data securely 24/7 from any web browser
- Optimize key business practices; eliminates wasted time re-entering data between different applications

The result: Improved productivity and efficiency, greater transparency, reduced risk and error, and lower IT overhead costs for your business.

Focus your company's resources on your business, not technology

As your CPA firm, Intacct provides us with powerful online tools to handle virtually all of your accounting and financial management needs. What's more, Intacct is easy to use, logical and intuitive. A full suite of financial applications and industry templates are included – all of which are customizable to address the unique financial needs of your business.

Intacct provides the tools your CPA needs to improve your financial performance, deliver better financial advice and help you make faster, smarter business decisions.

Easy-To-Customize Dashboards

- Select the data you need to see with easy-to-customize dashboards
- Red Flag alerts for AP/AR
- Access a wide array of business and financial reports
- Collaborate with your CPA in real-time

Introducing Intacct

Transforming Small Business Accounting and Financial Management

You get a complete suite of web-based tools

Core Intacct modules include: General Ledger, Accounts Payable, Accounts Receivable, Cash Management, Order Entry, Purchasing, Employee Expenses, Standard Reporting, Centralized Dashboards and more.

Delivered online via a best-in-class Software as a Service (SaaS) platform, Intacct provides 24/7 anytime, anywhere access for managing your financial data.

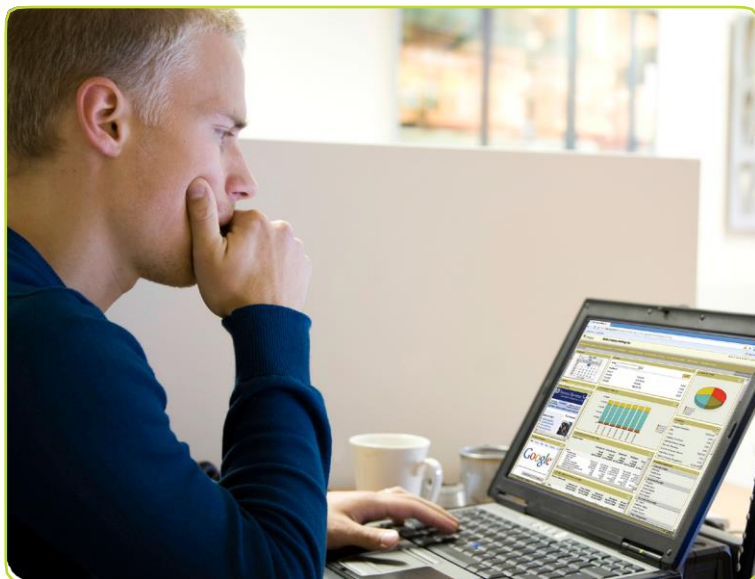

Intacct helps improve service and satisfaction by enabling CPAs and clients to collaborate using the same live data in real-time through a web-based accounting application. Changes made by your CPA are instantly visible to you. Your invoices and other supporting documents are instantly available to your accounting firm, so no time is wasted waiting for data files to be shipped, transferred or reconciled. In short, there is no need to exchange paper documents.

Intacct also includes financial best practices, business guidance, benchmarks and industry templates, all of which are customizable to serve a variety of needs, from basic processing services to highly complex analytics.

Backed by high reliability IBM data centers, Intacct provides world-class security, disaster protection, backup and recovery. And because Intacct uses no traditional software, multiple upgrades/versions are no longer necessary.

Get Started Today!

- With Intacct, your CPA can devote more time to helping you with a wide range of tasks, from write-up and bookkeeping to cash flow analysis and financial statements to budgeting and business planning.
- Reduces wasted hours by cutting the time it takes to fix data errors, reconcile books and meet with your CPA

With Intacct you'll work smarter, not harder!
